### **BWD WELL 6-2 PILOT TEST OPERABLE UNIT 2 GROUNDWATER Bethpage, New York**

This FACT SHEET summarizes key information about the Bethpage Water District (BWD) Well 6-2 Pilot Test activities in your neighborhood. Investigation activities will be performed by a consultant on behalf of US NAVY. In 2014, a new hot spot was identified in the Grumman plume. As required by the ROD, the Navy agreed to address it and submitted a strategic plan that included a pilot program at Bethpage Water District Well 6-2 to determine the capture zone of this well relative to the newly identified hot spot. Information gained from this pilot study will be used to determine the best approach to address the hot spot.

DEC, in consultation with DOH has approved this proposal. The consultant will follow the technical work plan approved by the New York State Department of Environmental Conservation (NYSDEC). Treated water will continue to be distributed into the water supply but there can be no degradation of water quality. Monitoring frequency will be increased.

BWD will be subcontracted by Resolution Consultants to operate Well 6-2 in a near-continuous manner and to manage treatment and distribution and/or disposal of the recovered groundwater for a period of 3 months. Resolution Consultants will simultaneously monitor water levels in nearby wells surrounding Well 6-2, collect air samples to monitor potential groundwater treatment impacts to ambient air quality, assess the data, and prepare a report of findings.

Work will be performed under the oversight of, and in accordance with methods approved by, the NYSDEC. Strict compliance with a written health and safety plan during field activities will ensure protection of the residents and the consultant's workers.

**ANY QUESTIONS OR COMMENTS?** If you have any questions about this work, or if you experience problems as a result of this work, please contact Mr. Henry Wilkie of the NYSDEC or Mr. Steve Karpinski of the NYSDOH or Mr. Bill Fonda using the information provided below.

**State Superfund Program:** New York's State Superfund Program (SSF) identifies and characterizes suspected inactive hazardous waste disposal sites. Sites that pose a significant threat to public health and/or the environment go through a process of investigation, evaluation, cleanup and monitoring.

NYSDEC attempts to identify parties responsible for site contamination and require cleanup before committing State funds.

For more information about the SSF, visit: <http://www.dec.ny.gov/chemical/8439.html>

## FOR MORE INFORMATION

### Where to Find Information

Project documents are available at the following location(s) to help the public stay informed.

BETHPAGE PUBLIC LIBRARY  
POWELL AVENUE  
BETHPAGE, NY  
phone: 516-931-3907

**We encourage you to share this fact sheet with neighbors and tenants, and/or post this fact sheet in a prominent area of your building for others to see.**

### Receive Site Fact Sheets by Email

Have site information such as this fact sheet sent right to your email inbox.

NYSDEC invites you to sign up with one or more contaminated sites county email listservs available at the following web page:

<http://www.dec.ny.gov/chemical/61092.html>. It's quick, it's free, and it will help keep you *better informed*.

As a listserv member, you will periodically receive site-related information/announcements for all contaminated sites in the county(ies) you select.

Note: Please disregard if you already have signed up and received this fact sheet electronically.
